1 Instrument Panel

1.1 Overview of Instrument Panel

1.	Sample Library Switch
2.	Preset Bar
3.	Tuner
4.	Current Position
5.	Note Information
6.	Pick Attack Accentuation Ratio
7.	Pick Attack Accentuation Ratio Humanization
8.	String Assignment Display

1.2 Preset Bar

There are four buttons: Previous  , Next  , Play  , and Save .

Clicking the preset name text box will open the preset file list window.

1.3 Tuner

You can tune every string by turning its corresponding tuner, 2 semitones down at most.

2.2 Articulations & Poly Legato

2.2.1 Articulation List

Abbr.	Full Name	Keyswitch	Range
Sus	Sustain & Accent	C0	A0-E4
NH	Natural Harmonic	C#0	B0-D4
PM	Palm Mute	D0	B0-E4
SIO	Slide In & Slide Out	D#0	C#1-E4
LS	Legato Slide (Poly Legato)	E0	C#1-E4
HP	Hammer-On & Pull-Off	F0	C#1-E4
Rep	Repeat Note	F#0	A0-E4

2.2.2 Sustain & Accent

Keyswitch is C0.

- Notes of velocity above 64 (incl.) will be Sustain (velocity 127 is Accentuation).

- Notes of velocity 32-63 will be Palm Mute
- Notes of velocity below 32 (excl.) will be Dead Note.

2.2.3 Natural Harmonic

Keyswitch is C#0.

2.2.4 Palm Mute

Keyswitch is D0.

- In this articulation, high velocity note triggers Palm Mute, while low velocity note triggers Dead Note.
- If keyswitches C0 and D0 are pressed at the same time, the special Sustain and Palm Mute mixed articulation is turned on. In this articulation, notes of high velocity will be Sustain and notes of low velocity will be Palm Mute.

2.2.5 Slide In & Slide Out

Keyswitch is D#0.

- Press D#0 then play a note (above fret 2) will trigger Slide In.
- Press D#0 while a note (above fret 3) is playing will trigger Slide Out.
- Reverts to Sustain automatically.

Poly Legato: Play multiple start notes on different strings at the same time, then play a higher or lower destination note. All start notes on different strings will trigger HP of the same interval, performing polyphonic legato.

2.2.8 Repeat Note

Keyswitch is F#0. Suitable for continuous playing of the same note.

2.2.9 Doubled Keyswitches

As mentioned above. Some keyswitches can be pressed together to enter a mixed articulation mode, in which different articulations are used based on note velocity.

- C0 and D0 pressed together: Notes of high velocity will be Sustain and notes of low velocity will be Palm Mute.

*If you're unsure about articulation or legato techniques, we recommend using Riffer to create and edit your MIDI. Once done, simply drag it into your DAW's MIDI track then you will have the same playback result as in Riffer.

2.3 Sound Mode

Mono and Stereo DI modes are available.

1.  Stereo Mode

-
2.  Mono Mode

2.4 Capo

It simulates the real bass capo. It can transpose the pitch without changing the fingering.

2.5 Position Mode

Supports 2 kinds of position modes of different fingering pattern:

1. 
Melody Mode: An ascending/descending fingering pattern over 3 octaves, suitable for playing solo/melody.
2. 
Chord Mode: The common fingering pattern that covers 5 frets of each string, suitable for play chords.

2.6 Buzz

When toggled on, notes will be randomly buzzed depending on frequency.

When you press A4, all ringing notes will be buzzed.

2.7 Rich Fingering Sound

In real performance, a lot of playing noises are generated. Virtual instrument would sound unnatural without those noises. Ample Sound Engine can generate rich Fret Noise automatically.

FA: Finger Touch Noise

FR: Finger Release Noise

2.8 Play Mode

Instrument Mode:  It is limited by the real playing rules of the instrument, such as two notes on the same string cannot ring simultaneously.

Keyboard Mode:  When Keyboard Mode is on, multiple notes can be played on same string simultaneously.

Solo Mode:  Only a single note can be played simultaneously.

* Both Keyboard Mode and Solo Mode will disable Automatic Legato.

2.9 Auto Legato Mode

There are 3 modes: Automatic Slide; Automatic Hammer On and Pull Off; Off.

* High velocity D#6 turns on Automatic Slide mode; Low velocity D#6 turns on Automatic Hammer-On & Pull-Off mode.

2.10 Open String First

B0 E1 A1 D2 and G2 5 notes will be played on open strings.

It can be toggled on with note G#6, High velocity toggles on, Low velocity toggles off.

2.11 Auto Stroke Noise

A strummed noise will be generated automatically for polyphonic notes.

2.12 Vibrato Wheel

Play the mod wheel back and forth to manually control vibrato. It triggers a vibrato noise when the value ≥ 0.75 .

* To vibrate automatically, open Settings Panel and toggle on Auto Mod.

* Mod time, mod gain, mod pitch, and the ADSR of auto modulation curve can be set in the Settings panel.

2.13 String Assignment and Position Assignment

2.13.1 String Assignment

Specify a string to be played. D#6-G6 correspond to 4th string-1st string. High velocity String Force will affect fret position, while low velocity will not.

2.13.2 Position Assignment

Switch to a fret position manually. A yellow line will be displayed after pressing G#0, notifying the notes that represent positions from 0 and up, then press the position note (B0-E2) to switch to a particular position.

* A position covers a range of 5 frets (12 frets in Melody mode).

2.14 FX Sound Group

Note	FX Sound
B4	Left-Hand Slap
C5	Right-Hand Slap
D5	Downstroke Noise

E5	Upstroke Noise
F5	Scratch 1
F#5	Scratch 2
G5	Muting
G#5	FX Slide Turn 5
A5	FX Slide Turn 4
A#5	FX Slide Turn 3
B5	FX Slide Down 5
C6	FX Slide Down 4
C#6	FX Slide Down 3

2.15 Note Repeater

Press C#5, D#5 to repeat notes being played. Multiple notes are supported.

2.16 Hold Pedal Toggle
