*The articulations and Legato are different in different instruments.

1.4.3 Articulation & Legato Rules

- Legato is available when notes are next to each other and on the same string, the Legato must be marked on the first note.
The speed of long legato slide (more than 2 frets) is determined by the velocity of destination note. Higher the velocity, faster the speed.
- Slide Out: Slide Out from the 50% point of a note;
1/4 Slide Out: Slide Out from the 75% point of a note;
1/8 Slide Out: Slide Out from the 87.5% point of a note.

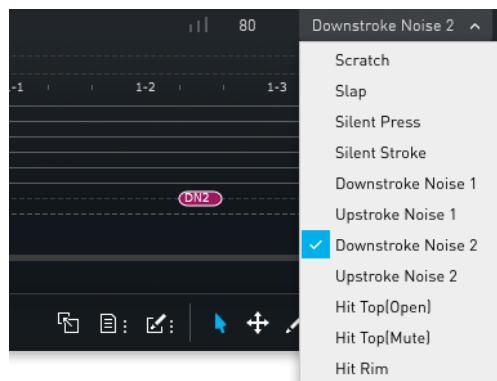

- Natural Harmonic is available on the natural harmonic positions (5th, 7th, 9th and 12th fret), the pitch is the same as Sustain.
- Slap or Pop dead note is available when switching to Slap or Pop, and the velocity is 1 - 63.
- Pop Slide In is available when switching to Slide, and the velocity is 127. (ABY only)

1.5 FX Line

1.5.1 Articulation & Legato Rules

Select a FX note, there are 2 options: Velocity and FX type (pitch) for each FX note.

*The FX type is different on different instruments.

1.6 Strum Line

Select a strum note, the strum note properties will be shown on the title area. There are Direction, Velocity, Strum Time, Articulation, Legato, Chord Root, Chord Type and Position altogether 8 options for each strum note.

All the notes in a chord will be changed if any option of the chord note is changed.
